

# STORAGE ROOMS

## BEHIND THE SCENES

These are just a few of the storage spaces we have in Castle House Museum. Above is the attic space where we store a lot of mannequins and props for exhibits or events.

On the right is the corridor leading to the back rooms which have not been touched in decades. The two large lamps that can be seen are from the front of Dunoon Burgh Hall and were the original fixings for the lamps at the front.

The wall shown below with the doorway but no door was part of the external wall of the original building design. A fireplace can also be seen that is no longer in use.
